Software Engineer in Ewing, NJ

Summary

Full-stack engineer with experience building workflow and reliability features for Postman Flows used by millions of developers. Improved onboarding for 300k+ developers at Appwrite through SDK examples and deployment documentation. Built and deployed customer-facing e-commerce platforms for small businesses, improving conversion and online sales.

EXPERIENCE

Postman, NYC, NY — *Full-stack engineer (Intern, Flows Team)*

January 2026 – April 2026

- Led shipment of file upload support for Postman Flows, a visual workflow builder for APIs, enabling 40 million+ developers and 500k+ organizations to use uploaded files in workflows across cloud, local, and deployed environments.
- Fixed a production issue preventing uploaded files from loading in Postman Flows by debugging TypeScript services running in Dockerized AWS environments, restoring reliable file access within workflows.
- Shipped multi-select and batch deletion features for Postman Flows, simplifying bulk workflow management for users.

Appwrite, Remote — *Technical Writer (Intern)*

January 2024 – September 2024

- Identified and closed critical gaps by adding missing deployment guidance for functions, sites, teams, topics, and buckets for 300k+ developers in Appwrite CLI documentation.
- Authored cross-language code examples (Go, React, Python) to improve onboarding clarity and support developers adopting CLI workflows across diverse stacks.
- Expanded Appwrite documentation to support Go by creating SDK examples, quick start guides, and reusable code snippets, improving accessibility for Go developers adopting the platform.

Freelancing, Remote — *Full-stack Engineer (2 long-term clients)*

January 2022 – Present

- Built and deployed full-stack e-commerce platforms using React, Express, and JavaScript for small businesses to help them transition from offline to online sales, generating \$11K+ in net profit.
- Optimized checkout flow and end-to-end user journeys to reduce purchase drop-off and improve conversion rates, contributing to 30+ paying customers across engagements.
- Delivered full-stack web applications across multiple small business clients, helping them establish and improve their online presence and customer acquisition channels through production-ready features.
